SUMMARY

B.Sc. (Hons) Computer Science graduate, Hansraj College, University of Delhi (CGPA: 8.015), with hands-on experience building RAG pipelines, multi-agent systems, and LLM-based evaluation and reasoning. Comfortable across Python, applied ML (Scikit-learn, NumPy, Pandas), and statistics/probability foundations, with production experience deploying these systems on PostgreSQL-backed infrastructure. Solved 300+ DSA problems and led a 6-engineer team at Smart India Hackathon 2025. Seeking full-time roles building Generative AI, Agentic AI, and applied ML solutions end-to-end.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, C++

AI / GenAI / Agentic: Retrieval-Augmented Generation (RAG), Multi-Agent Systems, LLM-as-Judge Evaluation, LLM Integration (Claude API, Groq Llama 3.3 70B), Prompt Engineering, Explainable Rule-Based Scoring

ML & Data: Scikit-learn, NumPy, Pandas, Feature Engineering, Statistics & Probability, Model Validation

Retrieval: FAISS (ANN), BM25, TF-IDF/SVD, Reciprocal Rank Fusion, pgvector

Additional Exposure & Simulations: Java, Spring Boot, REST API Development, Unit Testing (HPE Forage)

Infra & Tools: PostgreSQL, Docker, Celery/Redis, FastAPI, GitHub Actions (CI/CD), AI-Assisted Development (Claude Code)

PROJECTS

EvalOps — LLM Evaluation & Judge Calibration Infrastructure

Python, FastAPI, Celery/Redis, PostgreSQL, Claude/Groq API, Node.js

github.com/Anshu-AK-beep/evalops

- Architected an LLM-as-judge scoring system across 5 quality dimensions with chain-of-thought reasoning, validated at 87.5% agreement with human judgment against a hand-labeled calibration set; modeled safety as a distinct hard gate with automatic promotion of violations into a regression suite.
- Built an async FastAPI + Celery/Redis pipeline with statistically-grounded (z-score-based) drift detection, a pgvector-deduplicated CI/CD regression suite, a React analytics dashboard, and two SDKs (Python, Node.js) for one-line instrumentation.

Intelligent Candidate Discovery — RAG Retrieval & Reasoning Pipeline

Python, Scikit-learn, FAISS, BM25, Claude API | India Runs Hackathon (Redrob AI)

github.com/Anshu-AK-beep/intelligent-candidate-discovery

- Built a 5-stage retrieval pipeline (TF-IDF/SVD embeddings + FAISS ANN, BM25, Reciprocal Rank Fusion), ranking 100,000 candidate profiles against a job description in 28 seconds on CPU.
- Layered an explainable rule-based scorer with an LLM reasoning/re-ranking stage (40% LLM + 35% rule + 25% semantic); validated against 26 planted adversarial profiles with zero false positives.

Agentic AI Trading System — Multi-Agent Real-Time Decision Engine

Python, NumPy, Pandas, Multi-Agent Systems, Streamlit

github.com/Anshu-AK-beep/agentic-trading-system

- Designed and built a 4-agent system (research, technical analysis, risk management, execution) that collaborate autonomously to make real-time trading decisions — directly analogous to production multi-agent orchestration.
- Engineered the data and signal layer with Pandas-based time-series cleaning and NumPy-vectorized technical indicators (RSI, MACD) feeding each agent's decision logic; deployed as a live Streamlit application for continuous inference.

EXPERIENCE & HACKATHONS

Team Leader — Smart India Hackathon (SIH) 2025

2025

Hansraj College, University of Delhi | Team of 6

- Led a 6-member cross-disciplinary team across 3 parallel modules (ML pipeline, optimization logic, REST API service) using Agile sprint planning under time-constrained conditions; solution evolved into KrishiSaathi (deployed, live).
- Applied distributed backend + ML design patterns under time-constrained conditions.

Individual Participant — Hack2Skill AI4Bharat Hackathon

2025

Built ThinkMate — Real-Time Multi-Tiered Learning System

- Independently designed, built, and deployed a full-stack learning platform end-to-end within the hackathon's build window.

Individual Participant — India Runs Hackathon (by Redrob AI)

2025

Built Intelligent Candidate Discovery — RAG Retrieval & Reasoning Pipeline

- Independently built a 5-stage retrieval-augmented candidate ranking pipeline for a Data & AI Challenge, ranking 100,000 profiles in 28 seconds on CPU.

EDUCATION

Hansraj College, University of Delhi

2023 – 2026

B.Sc. (Hons) Computer Science | CGPA: 8.015 / 10

CERTIFICATIONS & ACTIVITIES

- Backend specialization: 300+ DSA problems solved, advanced PostgreSQL features (partitioning, BRIN, pgvector) | leetcode.com/u/Anshu-AK-beep
- HPE Software Engineering Job Simulation (Forage, Sep 2026) — REST API design & build, unit testing (Java, Spring Boot)
- Commonwealth Bank Data Science Job Simulation (Forage, Feb 2026)
